

## PORTA-FLOOR PORTABLE TENT & WALKWAY FLOORING

## **GENERAL INFORMATION**

PORTA-FLOOR is a system of plastic tiles, designed to provide a solid, finished floor surface for temporary use. When installed, the flooring will follow the natural contours of the ground and is ideal for most surfacing needs. Porta-Floor works well for tents, stadium grass protection, fairs, tradeshows, lawns, gravel drives or parking lots, marquees, walkways, dance floors, sand or beach areas, ADA requirements,

and access paths and many other special events.

To handle the problem of wet floor surfaces during your event, the Porta-floor tiles are ½" thick and have been designed to allow the flow of surface water underneath. The tiles also have holes in the plastic which, when laid over lawns, allow the grass below to breathe. Individual or groups of tile can be removed to work around permanent obstacles such as trees or planters.

For any event that requires a higher level of finish, carpet can be laid over the Porta-floor, creating a very classy event floor.

## **EASY SELF-INSTALLATION**

For a cost saving option install your-self and save. Special roll-up and roll-out design provides easy transport and quick installation. Porta-floor's underside is cross-ribbed for weight distribution and added strength. Rugged, non-slip surfaces with drainage channels that keep the top surface dry. Rolls come in 100 square ft pieces that are 5 foot wide by 20 ft long and can be easily connected. Simply connect or disconnect individual treads.

## PORTA-FLOOR COST

Porta-floor is actually one of the least expensive tent floor systems to rent and install. Prices are for 100 square feet rolls. For self-installation, rolls rent for \$30.00. For us to install, most event situations will cost about \$40.00 per 100 square feet. Other considerations may add to this cost. Call for specifics.
